Nuke Node Graph Easy Navigate

Hossein Karamian

Version 1.1

What is Km NodeGraph Easy Navigate ?

It's a tool to create node graph bookmarks and jump between them easily. Especially useful in large node graphs.

Compatibility

OS : Window

Nuke Version: 13,12, 11, 10.5, 10

Installation

Copy "Km_NodeGraphEN" folder to Nuke's plugins directory and add following single line code to end of the iniy.py file:

nuke.pluginAddPath('./Km_NodeGraphEN')

For Example, copy "Km_NodeGraphEN" folder to :

C:\Program Files\Nuke12.1v1\plugins

And add the code to :

C:\Program Files\Nuke12.1v1\plugins\init.py

Hossein Karamian

**Display BookMark Panel:** Press shortcut "shift+e" To display panel

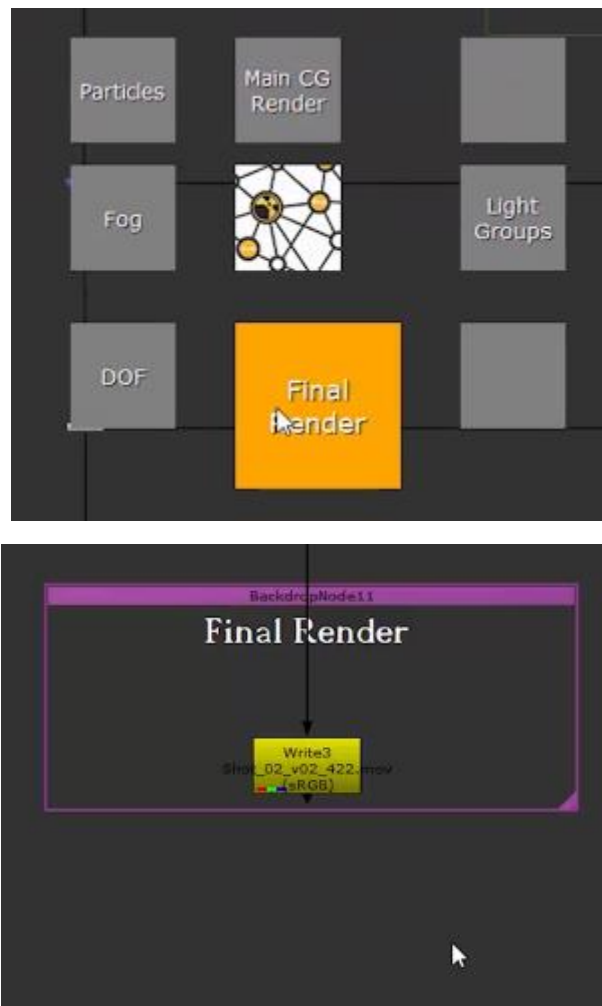

Or from menu bar :
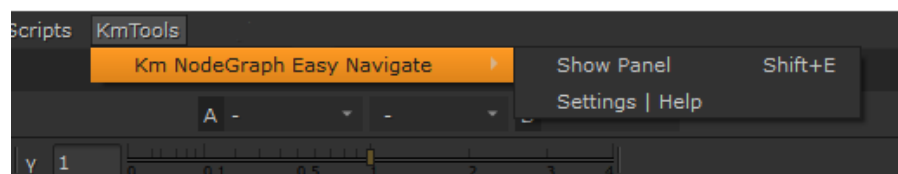

Define New Bookmark: Select a node (or backdrop), then left click on a empty bookmark to assign selected node to it
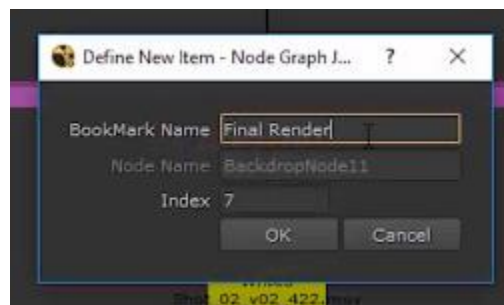

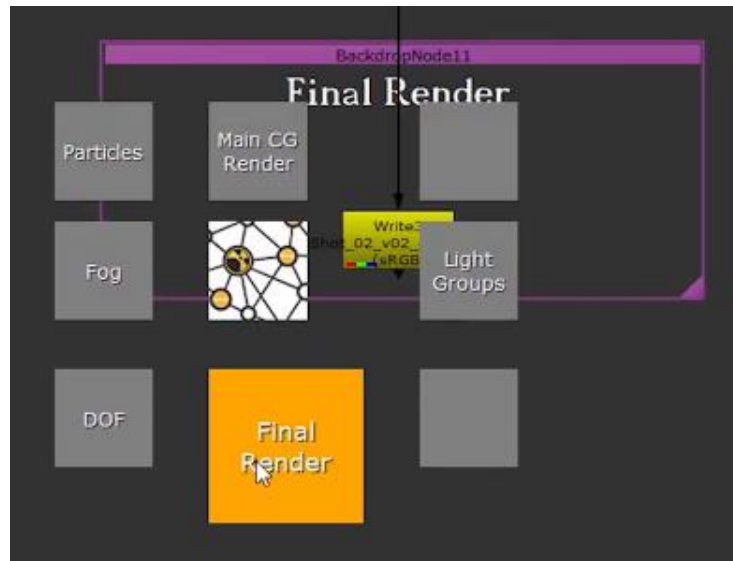

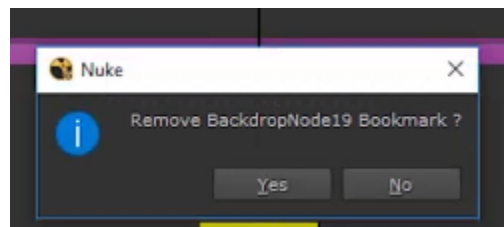

**Jump:** After assigning bookmarks, left click on any bookmark to jump

**Edit a Bookmark:** middle click to edit a defined bookmark

Hossein Karamian

Remove a Bookmark: right click to remove a defined bookmark

Settings: click on icon to open settings

you can change jump effect and shortcut
